School**Websites**

School Websites and Portals

Hello, we're School Branding Experts

Does your school have its own website?
Is it up to date and being regularly maintained?

A school website enables you to easily and proudly share all of your achievements and hard work with an internet community of parents, governors, pupils and teachers, 24 hours a day, 365 days a year.

A school website can act as a valuable communications tool, offering easily accessible information on the curriculum, newsletters, staff information on an unimaginable number of pages.

A school website allows information to be passed on to interested parties with the minimum of fuss and wasted time, and most importantly, without interrupting your staff! Contact us for more information on how we could help you to create an impressive and effective web presence for your school.

> " nothing less than a beautifully designed, interactive and highly accessible school website will do "
